In case you missed it, a recent tweet went viral for sharing incredible photos of people discovering their twin museum artworks. This content is imported from Twitter. You may be able to find the same content in other formats, or you may be able to find more information, on their website. Seems like a really rare phenomenon, right? Well, maybe not so much. Google Arts apps & Culture is already a great free way to appreciate artworks around the world, allowing users to explore nearly 1,000 museums and search for art by category and artist. But now it's even more fun thanks to new and experimental features that let you discover a resembling your own museum. Google Arts & Culture DOWNLOAD NOW: Google Arts app & Culture This app encourages you to take a selfie or a friend's photo and upload it so that the technology can almost instantly find people who look like you in the historical artwork in its partner museum. Of course, the GoodHousekeeping.com should give it a try. When Home Editor Lauren Smith uploaded a slightly smiling selfie, she discovered she bears a resemblance to unknown artist Portrait of a Young Woman. Lauren Smith / Google Arts & Culture; But funnily enough, as soon as he made a more serious face, he was told that he resembled Bartolomeo Veneto's Portrait of a Man. Lauren Smith/Google Arts & Culture And Social Media Editor Kayla Keegan doesn't know how she feels about being told she resembles a portrait of John Dive by Hans Hysing. (Don't worry, Kayla, it's only 38% of matches.) Kayla Keegan / Google Arts & Culture We also couldn't resist testing the app on some celebrities, and the results ranged from amazing to absolutely ridiculous. Meghan Markle: Getty/Google Arts & Culture Prince Harry: Getty/Google Arts & Culture Adele: Getty/Google Arts & Culture Beyoncé: Getty/Google Arts & Culture Mindy Kaling: Getty/Google Arts & Culture Olivia Wilde: Getty/Google Arts & Culture Uzo Aduba: Getty/Google Arts & Culture Susan Sarandon: Getty/Google Arts & Culture We also tried them on three separate photos from Taylor Swift, and the app literally can't count (What is meeeeeeaaan?) You can find your own museum twin by downloading a free app from Google or the Apple App Store. This content is created and maintained by third parties, and imported onto this page to help users provide their email addresses. You may be able to find more information about this and similar content in the Arts & Culture piano.io Culture arguably the best virtual museum you can visit from your smartphone right now. With its simple and intuitive interface and an extensive and growing collection of artworks, these cans can seriously become real-time sprinklers. Yes, it's a great app for art and history lovers, but guess what makes Art & Culture is so popular these days? A new feature that lets you match your selfies with Artwork, that's what. Yes, forget about actually having an interest in all this otherwise, but let people take a selfie and have it compared to painting and you've got yourself a jackpot. In fact, after the selfie matching function was added in a recent update, the Art & Culture is gaining so much online that it claims the No. 1 free app spot on Google Play in the US. People on social media go crazy posting their results from the app. Getting started is easy, just scroll down on the app's home page until you see this prompt But all right, let's talk about the technology behind it all. This is actually a relatively simple implementation of facial recognition through machine learning. Google has been experimenting with object recognition and scene matching for years (anyone remember DeepDream?), mainly to improve the different types of image searches it offers online, and now a simplified version of the technology is being used to match your selfies with paintings. But hey, that's a neat feature. Not only is it fun, but it might actually spark someone's interest in art, who knows! Once you get a match, you'll also see who the author of the painting is, as well as which museums are currently displayed. Sign up for our newsletter! Google launched their new service late Sunday night: Google Apps for Your Domain, a series of collaborative Google features for businesses and other organizations. Here's all about: Google Apps for Your Domain lets you offer our communication and collaboration tools throughout your organization — customizable to your branding, color schemes, and content through the administrative control panel, and without the hardware or software to install or manage. Features include Gmail, Google Talk, Google Calendar, and Google Page Creator, and you choose a combo that works for your business. Currently, you can sign up for a beta service, and best of all for free — considering all you get it is a pretty good deal. Are you planning on using Google Apps? Thoughts for commenting or tips on lifehacker.com. Google Apps For Your Domain You can even see what famous art looks like on your own wall at home. You have a museum in your pocket - all you have to do is download it. Google Arts & Culture has a number of ways to allow you to experience art, history, and culture without leaving your home. And since many businesses have closed and people have stayed at home to combat the coronavirus, a bit of culture and education is a wonderful thing. In fact, the Google Arts mobile app & Culture has many ways for you to experience great art with your own phone. No laptop or WiFi is required (although you still need your mobile phone network). But even better, the Google Arts & Culture has several features that you can use your phone's camera to access — so it's also an interactive experience as well as swiping through some amazing masterpieces from around the world. Effectively, use this app and turn your built-in camera smartphone to its own museum. Here are some ways to use the camera to discover some amazing features in the Google Arts & Culture app Culture. For more information or to download your own app, visit the App Store (iOS) or Google Play (Android). Never wondered what it's like to have famous art on display in your own home. You can create a virtual gallery in your own home. Tap your phone's camera to bring life-size artwork to your home and place it anywhere. Now you'll know exactly how Starry Night will look on top of your TV. This feature is in the Google Arts & Culture went a little viral in 2018 when the app first launched, encouraging everyone to post their best (or worst) selfies alongside famous artwork. This feature lets you discover art doppelgangers by matching your facial features with famous portraits. Now your phone is really an art gallery. This feature lets you browse through a total collection of works from artists throughout history. For example, you can view all 36 paintings by Vermeer (including Girl With The Pearl Earring) with impressive detail just by removing your phone. Ever wondered what artwork has the same color scheme as your sheets? Or what about that antique vase you bought at Etsy? This feature lets you browse through dozens of artworks that have the same color composition as the photos on your own camera roll. So, now you can find which iconic works also have the same hot pink color as the cute tops you're eyeing. Google Arts and Culture While many museums—including the Metropolitan Museum of Art and the Van Gogh Museum—offer virtual tours at home, nothing really lets you imagine what a particular art exhibition will look like in your home. But with the application Art & Culture, you can create interactive art experiences right in your own living room — or any space you like! From figuring out which famous paintings most resemble your selfies, to hanging virtual Van Gogh paintings in your living room, this free app turns your home into an art museum full of activities to keep you busy throughout the day. Ready for a museum experience in your home? Download the Google Arts & Culture to your smartphone or tablet and we'll walk you through four of our favorite features to help bring the museum experience (as well as some priceless pieces) to your space. Art Projector If you've ever wanted to display a famous painting in your home, but aren't sure how it actually looks, this tool is your goal. The Art Projector feature lets you imagine paintings like Van Gogh's rises on your wall. Click on the Art tool in your app that will access the camera view, allowing you to tap on the portrait located inside the menu at the bottom of your screen, so you can place it in your environment. This content is imported from YouTube. You may be able to find the same content in other formats, or you may be able to find more information, on their website. While I, for one, would argue that is art, you can find out which of the thousands of famous figures from art history you like the most. Take an in-app selfie and it will match your face with an iconic figure as well as offer you information about your art doppelgänger. This content is imported from YouTube. You may be able to find the same content in other formats, or you may be able to find more information, on their website. Full disclosure: this feature is not immersive, but lets you see the entire art collection of artists throughout history. For example, you can see all 36 Johannes Vermeer all on your phone. This is a great way to see the piece in detail plus familiarize yourself with all of the artist's work. And as if you were in a museum, you can read the background information in each section. This content is imported from YouTube. You may be able to find the same content in other formats, or you may be able to find more information, on their website. This feature shows you what famous portraits fit into a particular color scheme. Let's say your room has strong blue and pink pops. You can upload photos of your room to the app and create a personalized color palette for you as well as show you what famous artwork follows that color palette as well. This is a great tool to help you find paintings that will complement your space or just help you create your own mood board. This content is imported from YouTube. You may be able to find the same content in other formats, or you may be able to find more information, on their website. Follow House Beautiful on Instagram. This content is created and maintained by third parties, and imported onto this page to help users provide their email addresses. You may be able to find more information about this and similar content in piano.io piano.io
